

M. T. YOUNG

1962 DAYLILY PRICE LIST

800 South Lincoln Street

Tallulah, La.

LIBRARY RECEIVED
JAN 31 1962
U. S. Department of Agriculture

PLEASE READ CAREFULLY

Daylilies will grow in full sun or light shade. To do their best they should have full sun for one half day or more. Do not judge a daylily by the first year's bloom since two years or more are really needed to show what it will do. First year flowers will not be up to par in size, color, height or branching.

Plant about 2 feet apart. Place crowns one inch deep (crown is where the stalk joins the roots). Plant in good well worked soil, with some complete fertilizer or well rotted manure added several weeks before planting. Do not feed with commercial fertilizer in the fall. They are permanent plants and will not need dividing for 3 or more years depending on variety.

Guarantee.—All daylilies are guaranteed true to name and of the finest quality but no responsibility can be undertaken as to their growing, as this depends on care and local conditions.

Terms—Cash with order. Send money order or check. Postage paid in United States except to Alaska and Hawaii on orders of \$5.00 or more. For orders less than \$5.00 please add 50 cents for postage and packing. Canadian customers must add \$1.00 extra for postage.

Stock is limited in some varieties especially towards end of season, for this reason it is desirable to state whether a substitute is desired.

Shipping Season—March 1 to November 1 (also to Gulf Coast area in January and February).

Premium Offers—On varieties selected from this list I make the following offers (collections are not eligible).

For orders of \$10.00 or over choose 20% extra value.

For orders of \$25.00 or over choose 35% extra value.

For orders of \$50.00 or over choose 50% extra value.

These premium offers are made in order that you may select your gift plants and thus avoid duplicating plants you already have in your garden. They are allowed only as extra plants and do not apply to collection offers or wholesale prices.

DAYLILIES

The blooming season for each variety is indicated by the following code: E—early, EM—early midseason, M—midseason, ML—late midseason, L—late, D—dormant, Ev.—evergreen, N—night bloomer, R—repeat bloomer. Height of bloom stalk in inches follows name.
